19: Asboe M-3 (no date) 1937 AJ4 W. Tibetans AJ4 Lahul

241 787 before a verdict as to the propitious moment for beginning such occupations is given by the hierarchy, this custom is considerably relaxed in Lahoul, where the community does not pay so much attention to the priestly oracle as do the people living in the more remote valleys of Western Tibet.

Landmarks.

423 685 691 Rocks, stones and watercourses serve as landmarks to distinguish between the various farm holdings. When disputes occur, arising out of the removing of rock or stone landmarks, a subordinate in the Government survey department is called in to remeasure the land which is under dispute, and legal proceedings are taken by the offended party.

Virgin Soil.

425 When a farmer contemplates cultivating virgin soil, he has first of all to consult the wishes of the community, lest he should infringe the rights of communal pasturage, before negotiating with the Government authorities under whose administration he lives. If the community is agreed that there is no encroachment on the pasturage, a beer drinking party for all concerned is arranged at the expense of the farmer, who may then proceed to acquire the prospective piece of waste land from the Government.

[273]

Regulation of Water Supply.

312 624 An adequate supply of water from rivers, glaciers and accumulations of snow is essential in a practically rainless country such as Western Tibet is. Hence the community is most jealous in protecting its rights over such water supply. Two men (Las-pa) are chosen in rotation yearly by the villagers to supervise the communal water supply.

Their duties consist of (1) calling the villagers when the watercourse has to be repaired, (2) collecting beer from each household for the nourishment of about 14 people engaged in the repairs.

In Ladakh the watchers of the water supply are called 'Choo-spon' (lit. Master of the water supply). In cases where there is a communal reservoir for collecting water for the fields, the 'Choo-spons' (usually two or three men) allot the amount of water for each farmstead, and so prevent the possibility of one farmer stealing more water than is his rightful share.

241 312

Arrangement of Fields.

Owing to the mountainous nature of the

241 [231] [262]

range, the crops often fail for lack of sun-warmth. Ploughing is chiefly done by the hybrid of the yak bull and the common cow, known as *zo* (male) or *zomo* (female). This animal is also used for transport purposes. Grazing is limited, and consequently the number of live-stock is not large, but there are a fair number of ponies, those from Zāskār being famous. The food of the Ladākhis is the meal of *grim*, made into a broth and drunk warm, or else into a dough and eaten with buttermilk. The Ladākhis have no prejudices, and will eat anything they can get.

135 **Minerals.** Borax is produced in Rupshu, and salt is found. About 1,436 maunds of borax are annually extracted, but the industry is profitable neither to the people nor to the State. In former days sulphur, saltpetre, and iron were manufactured in factories at Leh, but the scarcity of fuel has now rendered these industries impossible.

286 **Manufactures.** Practically the only manufacture is that of woollen cloth, known as *pattū* and *pashmīna*.

439 **Commerce and trade.** The people trade in agricultural products with the Champas of Tibet and with Skārdu. Salt is largely exported to Skārdu, and in a less degree to Kashmīr, and is exchanged for grain, apricots, tobacco, madder, and ponies. The chief commerce is the Central Asian trade between Yārkand and India.

631 643 **Administration, &c.** Ladākh is in the charge of a Wazīr Wazārat, who is responsible for Baltistān and the three *tahsīls* of Ladākh, Kargil, and Skārdu. His duties are light. There is little crime and scarcely any litigation. The chief cases are disputes regarding trees, or complaints that one villager has stolen the surface soil of another. No police force is maintained, but a small garrison of State troops is quartered in the fort at Leh, a building with mud walls. The Wazīr Wazārat and his establishment cost the State Rs. 9,166 per annum. One of the chief functions of the Wazīr is the supervision of the Central Asian trade which passes through Leh. For this purpose he is *ex-officio* Joint Commissioner, associated with a British officer appointed by the Indian Government. Each subdivision of Ladākh is in the charge of a *kārdār* who is a Bhot. His chief duties are to see that all reasonable assistance is rendered to the Central Asian traders and travellers. For this purpose the villages of each *kārdāri* are made responsible for furnishing baggage animals and supplies in turn, and according to the capacity of each village to the stages situated within the limits of the *kārdāri*. This is known as the *reis* system. Primary schools are maintained at Skārdu and Leh.
